Official transcripts, scholarships, application packages, recruitment catalogs and diplomas are a sampling of academic items that are mailed or delivered in sealed envelopes. To meet those needs, we provide a multitude of secure, protective envelope products such as:

- **DuPont™ Tyvek®** — Classy texture, lightweight, water and tear resistant
- **Board Mailers** — Light gloss finish rigid straight jacket with a printing process that includes a special UV Dryer system so the ink doesn't smear or offset
- **Tamper Evident** — Includes an internal RED seal tape that can't be resealed. When opened, the red strip breaks and is evident the envelope has been opened.
- **Herculink®** — Reinforced fiber provides superior protection against bursting, while its poly layer provides moisture resistance.
- **Guardian** — Secure against RFID detection at 13.56 MHz. It protects chips and strips from scratching and moisture.
- **FiberCraft EF®** — Environmentally friendly, durable, made from 76% recycled paper
- **Tri-Brite®** — The brightest of bright, tear resistant envelopes

In addition to larger envelopes, student ID's and key cards can be protected in 2-1/4" x 3-1/2" DuPont™ Tyvek® credit card envelopes or Guardian envelopes, which protects against RFID detection.

Since serving our customers for over 50 years, we are the largest specialty envelope manufacturer in North America. Our envelopes are American-made and distributed from our plant in Louisville, KY.
